Summary of Qualifications

I'm a Programmer that seeks an opportunity on a creative position; Over 6 years of experience in the vast world of web development, Experience Managing Teams and crafting projects to perfection.

Profile

I'm a multitasking creative person that likes to solve problems and I believe there is always more than one solution to a problem, I have Excellent presentation and communication skills, I am a very good team member, I have experience working with clients and managing timelines, I'm not easily discouraged by limitations.

Experience

Gobble Communication Group

2010 April – Present - Front End Developer
Agency work has been really interesting so far, working closely with teams overseeing projects meeting with clients and conducting research to better respond to client requirements
Some of my work:
- Installing, Theming Wordpress sites,
- Create, Edit, JSP Pages using the JavaServer Pages Standard Tag Library
- Multiple Javascript Fixes, additions to projects including, Creating a tab based view with cross-browser gradients and round corners, Form Validation, Extensive DOM Manipulation
- Styled and updated Page Styles using compliant rules
- Cut templates always using cross-browser markup XHTML Strict and Transitional
- Facebook Tabs
- Flash Ads, Flash billboards

X1FM Network

2008 – 2010 - IT Director
My responsibilities as the IT director, varied from Networking to oversee the audio/video production, and the website development, my main goals where to build from scratch a system that could hold to the demand and expand as necessary, I was responsible for the budget and final delivery of the product, we released a new version of the site that will remain the spirit of the service for at least 1 year. The Project includes MySQL Master – Slave setup, 4 load balanced Web Servers, and 2 Streaming origin servers, 2 rsynched Storage servers between remote offices, 2 utility servers for SVN and Monitoring with Nagios and Cacti.

2007 – 2008 - Web Developer
I Joined X1FM moments before I finished my school as a web developer, when I joined I was in charge of all of the Flash development, then I proposed the change to a more easier to manage system under PHP/MYSQL which was accepted and I lead the project until it was finished.
